8 piece Start Weaning kit

1 x non spill 1st tumbler
2 x prep 'n' go food pots
2 x soft tip weaning spoons
2 x press 'n' pop mini freezer pots
1 x on the go weaning set with weaning spoon

Our range of Vital Baby® weaning accessories has been specially designed to make weaning easy.

- It's all about the shape! Our famous Weaning Spoons are perfectly shaped for weaning and the soft spoon tips protect sensitive gums.
- Making your own homemade weaning foods couldn't be easier! Our Mini Freezer Pots' soft bases mean once you take them out of the freezer, all you need to do is press the soft base and the frozen food cube will simply pop out.
- First meals and snacks are covered with our Food Pots which are perfect for feeding first solid meals. Their clip on lids make them perfect for snacks whilst out and about too!
- A soft spout, easy grip base, accurate measurement markings and hygiene cover make our 1st Tumbler the perfect choice for feeding your baby liquids. Its clever variable flow non-spill valve helps avoid messy spills as well as providing a smooth drinking action for your baby. However, if you want a free flow drinking cup for your baby, simply pull the valve out and hey presto! Your cup is now in free flow mode! How clever is that?!

INSTRUCTIONS FOR CARE AND USE

IMPORTANT! READ THIS INFORMATION BEFORE USE:

Cleaning & Care:

Fully disassemble and wash all items in warm soapy water, rinse in hot water and air dry before using for the first time and after each use. All the items in this weaning kit are all top rack dishwasher safe and can be sterilised by all sterilising methods.

They are all suitable for use in the microwave oven. Do not use abrasive or solvent based cleaning agents as this may cause damage. Store in a dry, covered container and out of direct sunlight when not in use.

Note: To use your cup as non spill. Insert the valve into the inside of the cup by pressing it firmly into place, making sure the silicone strap is covering the outlet hole. Alternatively you can choose to use your cup as free flow by simply removing the valve altogether.

For your baby's safety and health

WARNING:

- Always use this product under adult supervision.
- Before each use, inspect the product. Throw away at the first sign of damage or weakness.
- Keep all components not in use out of the reach of children.
- Always check the food temperature before feeding. Be extra careful if using a microwave to heat food or drinks. Stir warmed food well to disperse and localised hotspots. Remember to remove the lid before using a cup in the microwave.
- Continuous and prolonged sucking of fluids will cause tooth decay - tooth decay in young children can occur even when non sweetened fluids are used. This can occur if baby is allowed to use the cup for long periods through the day and particularly through the night, when saliva flow is reduced or if it is used as a soother.

This product conforms to BS EN 14372 and BS EN 14350 standards.
